Booman Inc. · moneypuzzle.co.kr

KARAOKE

TOUR

Introducing Money Puzzle - Lab

Money Puzzle - Lab builds and launches apps one at a time. Online karaoke comes first, followed by inbound travel and then securities.

KARAOKE

StageSong online karaoke

Sing, post and watch together on your phone. In development, launch planned within 2026

karaoke.moneypuzzle.co.kr

TOUR

Tour for Korea

Hand-drawn tourist maps + AI picks and trip planner in 6 languages. In development

navi.moneypuzzle.co.kr

HTS

HTS (securities) apps: Stock, HTS, Mini

Asset allocation by risk profile. The apps exist, but the CEO is the only real user

hts.moneypuzzle.co.kr

Business sequence — karaoke opens first

The order reflects regulatory and legal constraints

1

Online karaoke

StageSong

Launch planned within 2026

2

Inbound travel

Tour for Korea

Next stage

3

Securities portfolio trading

Stock · HTS · Mini

Later stage

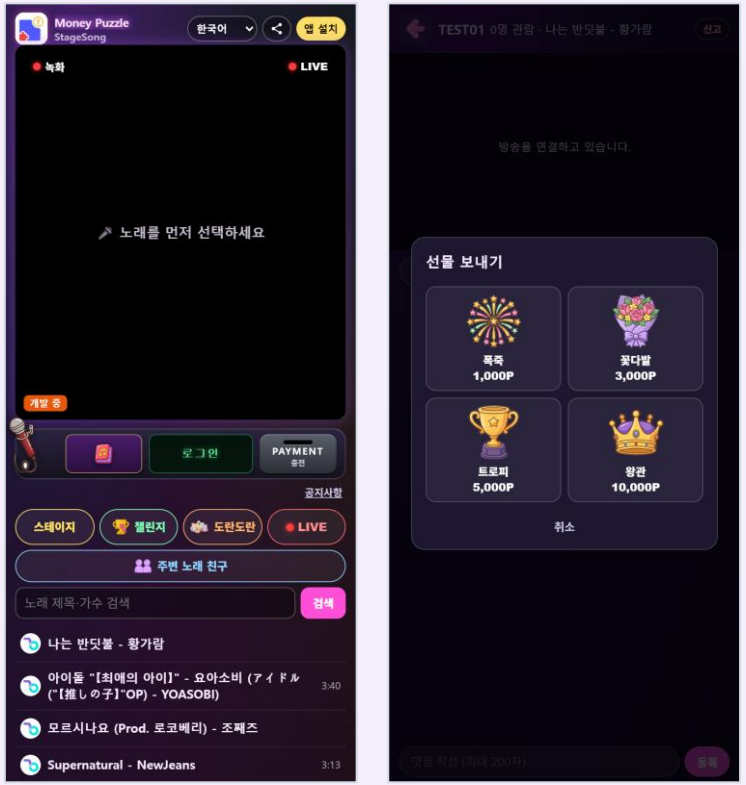

All financial and investment figures in this deck are for the online karaoke business only

PART 1 · KARAOKE

StageSong

The Facebook and YouTube of karaoke

A singing service to perform, post and watch together on your phone

IR-Karaoke Part · Booman Inc. · November 2026

PROBLEM

Singing is fun, but nothing is left afterward

Three pain points we see — hypotheses not yet validated by market research

1

It ends in the room

A karaoke room includes only those there at that moment. Singing with faraway friends is hard.

2

Nothing is kept

There is no good place to rewatch great moments or show off videos and scores.

3

No audience

No one listens when you practice alone. Singers need a stage that earns applause.

One phone to sing, post, and reach friends and an audience

SOLUTION

The Facebook and YouTube of karaoke

The home screen is as simple as a karaoke machine, with a stage and people inside

Recording · Stage

Record and post songs, then get hearts, comments and scores

Just Us Singing

Share videos in mutual-follow rooms. Rooms auto-delete after 3 months

Dorandoran

Video lounge for up to 9. Chat, then sing and dance together

LIVE

Pick a song and go live. Viewers join with comments, emojis and gifts

Ranking awards

Weekly, monthly and champion rounds, with point prizes and profile stars

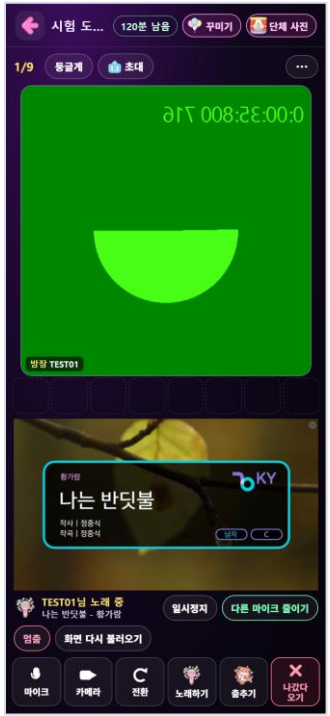

Face masks

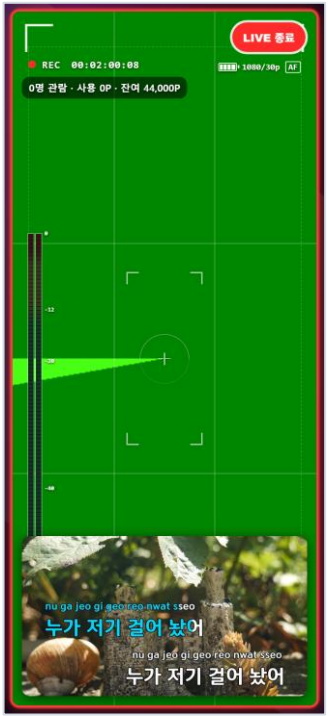

Join without showing your face. 26 wigs, masks, animals and more

The aim: scores, hearts and stars bring singers back, and sharing brings new users

PRODUCT

A working product — real app screens

26 face masks

Full blur if face is lost

Photos: AI-generated virtual people

Captured on test accounts. The green video is a virtual camera used for PC testing.

BUSINESS MODEL

Songs first, fun on top

Price list. Sold as prepaid points (1P = KRW 1). No actual sales yet

Category	Product	Price (P)	Company income type
Passes	1 · 3 · 6 · 12-month pass (3/6/12-month are proposed prices)	10,000 · 27,000 · 50,000 · 90,000	Subscription, no auto-renewal
Rooms	Dorandoran 2 hours · Just Us Singing room	3,000 · 3,000	Room-opening income
LIVE	Paid by streamer, per viewer per hour	100	Usage-based
Gifts	Fireworks · bouquet · crown · trophy · gem · golden mic	1,000~200,000	Company income +40%
Items	26 face masks · room decor (venues, props, bouquets)	Masks 3,000~6,000 · venues 5,000~10,000 · props 2,000~5,000	Usable until midnight of purchase day
AI	AI photo · group photo · AI video	3,000 · 5,000 · 15,000	Per-item sale

Premium concept: professional designer items at 10,000P each (not released)
Video ads: after 100,000 cumulative users in a year, ads may run behind lyrics and between songs (subject to Kumyoung contract)
Online store: streaming gear sets (headsets, earphones, mics, speakers, lamps) from Year 2 (not in financial projections)

UNIT ECONOMICS

Margin potential — products that cost little per sale

100P

LIVE, per viewer per hour

Server cost about KRW 50 (720p, 0.73GB, at list prices)

+40%

Company income on gifts

Fee income with almost no variable cost

2x or more

AI video at 15,000P

Priced at 2x or more of external AI cost

Built once

Mask artwork

Low added cost per sale

- **Prepaid points** Cash comes in first, then is handled under usage and refund rules
- **Repeat purchases** Rankings, gifts and seasonal items bring buyers back
- **Web top-up first** The same 50,000P costs KRW 50,000 on web, KRW 60,000 in app. No store fee on web

Figures above exclude Kumyoung and KOMCA royalties and payment fees. Actual margins are set after contracts

MARKET

Linking two markets — karaoke demand and live gifting

Offline demand

KRW 1,355.7B

Karaoke room operator revenue (2010)

35,316 businesses (2011)

Old official statistics. Latest figures need checking

Live streaming and gifting example

KRW 469.7B

SOOP 2025 consolidated revenue

Operating profit KRW 122.0B

Includes ad revenue. A comparison, not our target

Mobile karaoke app market size is omitted because we found no credible statistics.

Sources: Korea Creative Content Agency music industry statistics (2010, 2011) · press report on SOOP 2025 results (SmartToday, consolidated)
Figures to be confirmed against original filings and statistics.

KARAOKE · CURRENT STATUS

As it stands — pre-launch, no revenue

Built so far

- Singing · recording · stage · comments · emoji reactions
- LIVE (reception on another phone confirmed) · gifts · Dorandoran · Just Us
- Point wallet · passes · automatic ranking awards · 26 masks
- 6 languages · internal Android install · admin screens

Not yet in place

- Before official launch — not open to the public (identity check not connected)
- Real users: 1, the CEO (internal) · app revenue KRW 0
- No Kumyoung contract or KOMCA royalty talks yet — now plays Kumyoung's official YouTube
- Live payments (PG) not complete · not yet on app stores

Business sequence: ① Online karaoke (launch planned within 2026) → ② Inbound travel → ③ Securities portfolio trading
Launch conditions: identity check · Kumyoung and KOMCA contracts · live payments · app store listing

Five issues to solve first

Risk	Detail	Response
Rights	Terms for backing tracks, lyrics and composition, and scope of live streaming, not settled	Hold public LIVE until rights are cleared (admin switch)
Demand	Paid conversion and return visits not yet validated	Replace scenario assumptions with measured data after launch
Content	Inappropriate content in open-audience streams	Reporting · kicking · instant admin shutdown · stream recordings kept 30 days
Minors	Protecting users aged 15–18	Age 15 entry gate · adults-only streaming · no teen gifting · KRW 200,000 monthly top-up limit
Regulation, cost	Rules on points and paid gifting; fluctuating streaming costs	Streamer cash settlement planned · KRW 500,000 daily gift limit per person · KRW 50,000 daily streaming cost cap · rules to be checked

User basis — daily visitors plateau at 280

Online karaoke business only · Left: Korean Android DAU, Mobile Index 2025-03-30 · Forecast

App	DAU
Modu Noraebang (모두의노래방)	44,598
StarMaker	7,616
Mising (미싱)	3,425
Smule	2,106
Ssumsing (쎔씽)	1,374
Total	59,119

Avg. daily visitors	Monthly growth	Year-end
Year 1 (50 in month 1)	5%	86
Year 2	10%	268
Year 3	280 cap	280

Financials use the right-hand table. Visitors are assumed not to grow beyond 280.

Weak assumption: Year 2 growth of 10% a month has no measured basis. It needs both higher marketing spend and word of mouth.

The left-hand table is a market reference, not a company target.

Source: Digital Daily, 2025-04-02 (citing Mobile Index)

Revenue basis — line-by-line calculation

Online karaoke business only · Company assumptions, not measured · No actual sales · Forecast

Unit: KRW M

Revenue line	Detail	Year 3 basis	Year 1	Year 2	Year 3	Total
Regular customers	Songs and basic spend	About KRW 2,980 per visit	78	197	300	574
Item repurchases	Items last until midnight of purchase day	About KRW 1,790 per visit	47	118	180	345
Streamer performance gifts (+40% new income)	Income that exists only with performances	40% of KRW 375M gift purchases	39	98	150	287
High spenders	Big-ticket customers	Company assumption	52	131	200	383
Ads	After 100,000 cumulative users in a year · subject to Kumyoung contract	KRW 8,000,000 a month · from month 25	0	0	96	96
Total revenue			**215**	**544**	**926**	**1,685**

All items are company assumptions with no actual sales. Monthly users = daily visitors × 6.4; 1,792 in Year 3. Year 3 visits: 100,800 (280 × 30 days × 12 months).

Years 1–2 use the same 300:180:150:200 split, with no ads. From month 25, other lines shrink as ads grow, keeping total revenue unchanged.

Per-visit averages for regular customers and items are revenue divided by annual visits, not measured. With items lasting until midnight, this equals buying one lowest-priced 3,000P item on 6 of every 10 visits.

Streamer performance gifts: 40% of gift purchases are added as new company income. Year 3 gift purchases forecast at KRW 375M.

High spenders are 23% of 3-year revenue, 40% with performance gifts. Ad income is subject to a Kumyoung contract. Minors' monthly top-up limit: KRW 200,000.

Streamer cash settlement is planned; the financials reflect only company income +40%. The online store is not included.

FINANCIAL PLAN · ONLINE KARAOKE BUSINESS ONLY

Earnings on one page — from visitors to profit

Online karaoke business only · Year 3 · Forecast

Daily visitors	Monthly users	Monthly revenue	Annual revenue	Annual costs	Annual profit
280	1,792	KRW 77M	KRW 926M	KRW 705M	+KRW 221M
Year 3 average	Daily visitors × 6.4	About KRW 275,700 per visitor	× 12 months	Variable, marketing, items, fixed	Before corporate tax

Stage	Year 1	Year 2	Year 3
Avg. daily visitors	66	168	280
Revenue (KRW M)	215	544	926
of which ads (KRW M)	0	0	96
Variable costs (KRW M)	78	197	310
Marketing (KRW M)	60	76	89
Item development (KRW M)	2	2	2
Fixed costs (KRW M)	265	301	304
Profit (KRW M)	**-190**	**-32**	**+221**

Variable costs: 42% of regular, item and high-spender revenue; 10% of streamer gift income and ads (company assumption: no royalties, payment and server only). 42% assumes 85% in-app payments and a 15% Google/Apple fee (small-business program). See appendix.

Marketing — stepped up with visitor growth

Online karaoke business only · Forecast

Unit: KRW M

Period	Monthly marketing	Annual marketing	Year-end daily visitors
Year 1	5.0	60	86
Year 2 (+0.2 each month)	5.2 → 7.4	76	268
Year 3 (flat)	7.4	89	280

Why it steps up: visitors grow 10% a month in Year 2, so spending rises KRW 0.2M each month to support new sign-ups.
In Year 3 visitors reach the 280 cap, so spending stays flat at KRW 7.4M a month to offset churn rather than drive growth.
This step-up is a company judgment, with no measured ad efficiency. It will be recalculated with actual acquisition costs after launch.

Cost plan — staggered hiring

Online karaoke business only · Forecast

Unit: KRW K

Item	Year 1	Year 2	Year 3	3-year total
CEO (salary 60,000, from month 1)	60,000	60,000	60,000	180,000
Developer (salary 70,000, from month 1)	70,000	70,000	70,000	210,000
Character designer (salary 55,000, from month 1)	55,000	55,000	55,000	165,000
Marketing (salary 55,000, from month 7)	27,500	55,000	55,000	137,500
Social insurance etc. (10% of payroll)	21,250	24,000	24,000	69,250
Shared office (308 per person a month × staff, 210 setup in month 1)	13,146	14,784	14,784	42,714
Server and Cloudflare base fees	6,000	9,000	12,000	27,000
Legal and identity verification	6,000	6,000	6,000	18,000
Image generation, outsourcing, Kmong seed videos	6,000	7,000	7,000	20,000
Total fixed costs	**264,896**	**300,784**	**303,784**	**869,464**
Online marketing	60,000	75,600	88,800	224,400
AI image tool (Nano Banana higher tier)	2,000	2,000	2,000	6,000
Total costs (excl. variable)	**326,896**	**378,384**	**394,584**	**1,099,864**

Launch month = month 1. Items are made in-house by the character designer using AI image tools.

Customer support will rely on AI responses and automated monitoring, with no dedicated staff. Monitoring is built; AI response is not yet.

Shared office: WeWork Samseong Station quote (2026-10-14, 12-month term, excl. VAT). KRW 308K per person from KRW 924K a month for 3; 4 people at the same rate is a company assumption. KRW 1.32M refundable deposit separate.

3-year projection — forecast

Online karaoke business only · Variable costs 42% or 10% by line

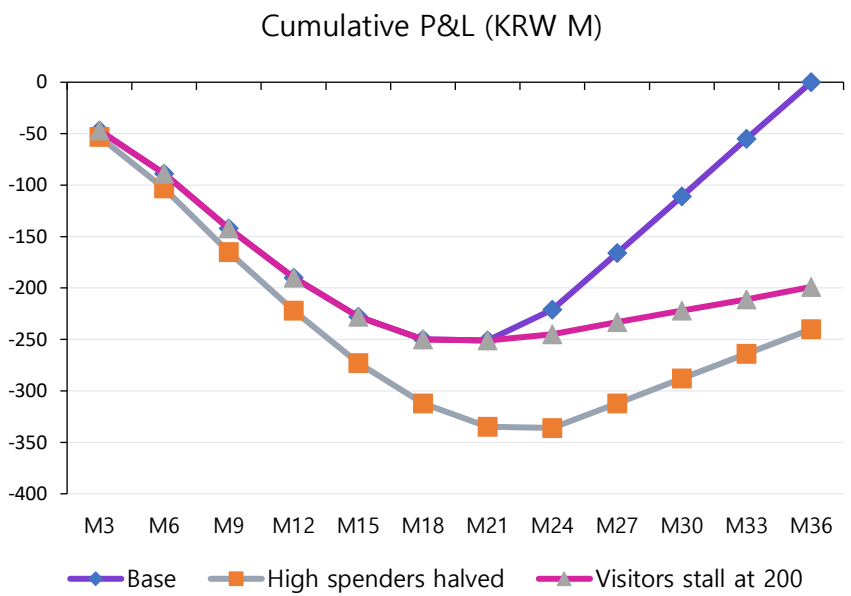

Unit: KRW M

Item	Year 1	Year 2	Year 3	3-year total
Base · Revenue	215	544	926	1,685
Base · Variable costs	78	197	310	585
Base · Marketing	60	76	89	224
Base · Item development	2	2	2	6
Base · Fixed costs	265	301	304	869
Base · Operating profit	**-190**	**-32**	**+221**	**0**
Base · Cumulative P&L	-190	-221	0	—
High spenders halved · Revenue	170	429	751	1,350
High spenders halved · Variable costs	65	164	261	490
High spenders halved · Marketing	60	76	89	224
High spenders halved · Item development	2	2	2	6
High spenders halved · Fixed costs	265	301	304	869
High spenders halved · Operating profit	**-222**	**-114**	**+96**	**-240**
High spenders halved · Cumulative P&L	-222	-336	-240	—

Operating profit = revenue − variable costs − marketing − item development − fixed costs. Before corporate tax. Year 3 revenue includes KRW 96M of ads. Monthly breakeven: base case month 21 · high spenders halved month 24.

Breakeven and sensitivity — forecast

Online karaoke business only · Includes CEO pay · Kumyoung and KOMCA royalties not set

Case	Monthly breakeven	Cumulative low (KRW M)
Base (variable 42%)	Month 21	-253
Royalty 10% (variable 32%)	Month 19	-216
Royalty 30% (variable 52%)	Month 22	-296
App fee 30% (variable 54%)	Month 22	-306
High spenders halved	Month 24	-339
Visitors stall at 200	Month 21	-253
No ads	Month 21	-253

Covering Year 3 costs takes about 179 daily visitors.

At 280 visitors, the end of Year 3 shows a KRW 18.4M monthly profit.

Royalty and app fee % apply to regular, item and high-spender revenue; the 10% variable cost on performance gifts and ads is fixed. High spenders halved cuts high spenders and performance gifts by half; No ads removes KRW 96M of ads. Visitors stall at 200 scales all lines, including ads, to visitor count.

THE ASK · ONLINE KARAOKE BUSINESS ONLY

Funding need — calculated from costs

Online karaoke business only · Base-case cumulative low + 6-month buffer · Forecast

Amount needed

KRW 450M

= Base-case cumulative low of KRW 253M

+ 6-month buffer of Year 1 costs, KRW 163M

→ Rounded up to the nearest KRW 50M · includes CEO pay

KRW 300M excluding CEO pay

How to read this

If high spenders halve, the cumulative low is KRW 339M and the need is KRW 550M

Base case: monthly breakeven in month 21, Year 3 profit of +KRW 221M

The KRW 96M of ads requires a Kumyoung contract. If visitors stop at 200, the cumulative low is KRW 253M

Round stage and equity terms are not set

PART 2 · TOUR

Tour for Korea

Illustrated maps + AI guide for foreign travelers

6 languages including English, Japanese and Chinese · Inbound travel

IR-Tour Part · Booman Inc. · November 2026

Foreign travelers in Korea hit three walls

1

Where to go?

No tourist map lets unplanned visitors choose at a glance. Information is scattered across lists and articles

2

Map apps are hard

Naver and Kakao maps are accurate but Korean-centric. Google Maps has limited directions in Korea

3

Language barrier

A word of Korean can stall things at restaurants, taxis and pharmacies. Finding care in a hurry is hard

8 in 10 inbound visitors travel independently, without a guide (80.5% in 2024)

Source: Korea Culture & Tourism Institute, 2024 International Visitor Survey (Jul 2025)

TOUR · SOLUTION

Illustrated tourist map + AI guide, in one app

1

See and choose

Tap a drawing on the hand-drawn map for details, distance from you and transport

2

Ask the AI

Type "I want to see hanok" for picks, then daily itineraries and restaurants from saved places

3

Help when stuck

Show a Korean screen, interpret, find nearby hospitals and pharmacies

Four differences from regular map apps

1 Hand-drawn tourist maps

Attractions are drawn as art. The map is the guidebook — you see where to go at a glance

2 AI picks · Trip planner

One sentence gets picks, then daily plans, routes and restaurants from your lodging. PDF and sharing

3 6 languages

Korean, English, Japanese, Chinese (Simplified, Traditional), Spanish. Screens and AI answers follow your choice

4 Built for foreigners

🌐 Korean-screen button, interpreting, emergency care, agency and day-tour links, hand-off to Naver and Google Maps

Map apps find the way · Tour for Korea picks where to go and plans the day

Illustrated maps covering all of Korea

19 maps — 1 national + 18 regional and neighborhood

25 Seoul district maps

298 attraction drawings (sum across maps)

Seoul, capital area, Gangwon, Chungcheong, Jeolla, Gyeongsang, Gyeongju, Busan, Jeju · "Welcome to Korea" billboard by Incheon Airport

AI picks, AI plans

1

AI picks

Describe what you want → map attractions and nearby places, with reasons

Real app screens (October 2026, beta)

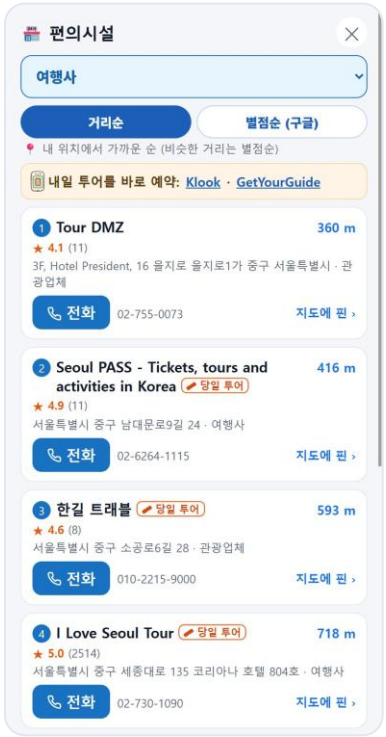

2

AI trip planner

Daily plans from saved places · start from where you are · nearby restaurants · PDF and sharing

TOUR · PRODUCT · ON THE ROAD

What you need on the road, right on the map

AI restaurants

Within 1.5km, with Google ratings and reviews · sort by distance or rating

AI gift finder

Recipient and budget → gift ideas and nearby shops

Agencies · Day tours

Nearby agencies, direct Klook and GetYourGuide booking links

Distance · Transport

Km from "Me" to destination; train, subway, bus

Interpreting · Korean screen

Show-to-locals phrases, Google Translate chat, Korean screen

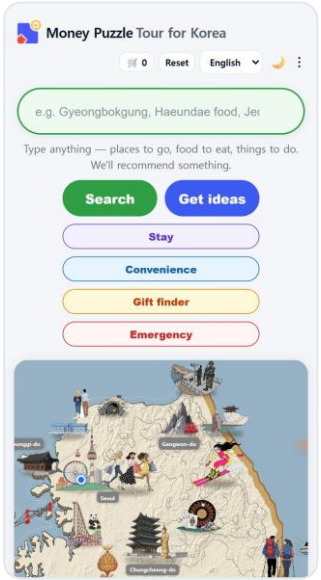

Emergency

Find nearby hospitals and pharmacies fast

Choose a language, and the whole app follows

Korean

English

Japanese

Simplified Chinese

Traditional Chinese

5 shown + Spanish = 6 languages · AI picks, itineraries and translated shop names follow the same language

Billboards on the map — promotion inside the map

National map · "Welcome to Korea" by Incheon Airport — 8-second jumbo jet landing video → 3D letters

Seoul map · video billboard by Bukhansan (seasonal video)

3 current spots

① National map home: "Welcome to Korea"
② Seoul map video billboard
③ Gwanghwamun map: ad inquiry building

Possible expansion (draft)

1 spot on each of 18 regional and neighborhood maps and 25 Seoul district maps

Billboards move with the map

They stay in place on zoom and pan, and video plays only on that map — the map is never blocked

TOUR · MARKET

Foreign visitors to Korea at a record high

18.94M

2025 inbound visitors · +15.7% year on year

17.11M

Jan–Sep 2026 cumulative · +21.5% vs same period last year

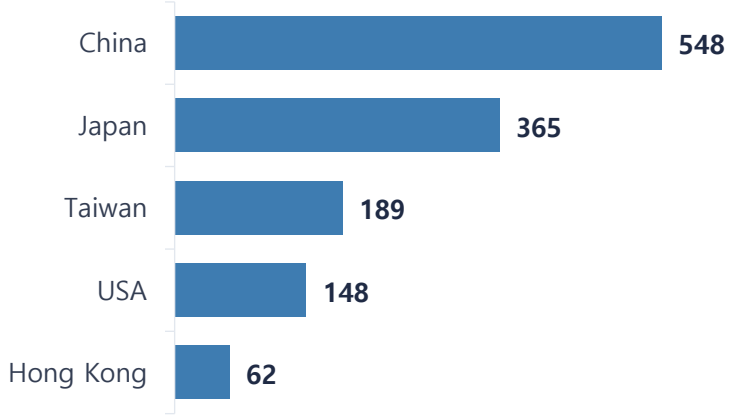

80.5%

Independent travel share (2024)

$1,372

Average spend per person (2024)

2025 visitors by nationality (10,000s)

Supports all top-nationality languages (Simplified and Traditional Chinese, Japanese, English) · Government target: 30M by 2029

Sources: Korea Tourism Organization, Korea Tourism Statistics Dec 2025 (30 Jan 2026) · Ministry of Culture, Sports and Tourism, September tourism trends (22 Oct 2026) · Korea Culture & Tourism Institute, 2024 International Visitor Survey (Jul 2025) · 11th National Tourism Strategy Meeting (25 Feb 2026)

TOUR · COMPETITION

Others do directions and booking; we do "where to go"

Service	Strength	Gap for foreign travelers
VISITKOREA (Korea Tourism Organization)	Official tourist info, multi-language	List and search — choosing and planning is left to the visitor
Naver Map	Most accurate roads and transit	Shop info and reviews mostly in Korean
KakaoMap	Korean directions and place info	Centered on Korean speakers
Google Maps	Familiar to foreigners	Limited directions in Korea
Klook · GetYourGuide	Tour and ticket booking	No on-site maps, directions or local info

Us: choose on the illustrated map and plan the day with AI, then go straight to Naver or Google Maps for directions and Klook or GetYourGuide for booking

TOUR · CURRENT STATUS

As it stands — in development, beta

Built so far

- 19 maps · 25 Seoul districts · 298 attraction drawings
- AI picks, trip planner, restaurants, gift finder
- 6 languages · interpreting · emergency · agency links
- Payment module (off) · admin screens (tap stats, partner inquiries)

Not yet in place

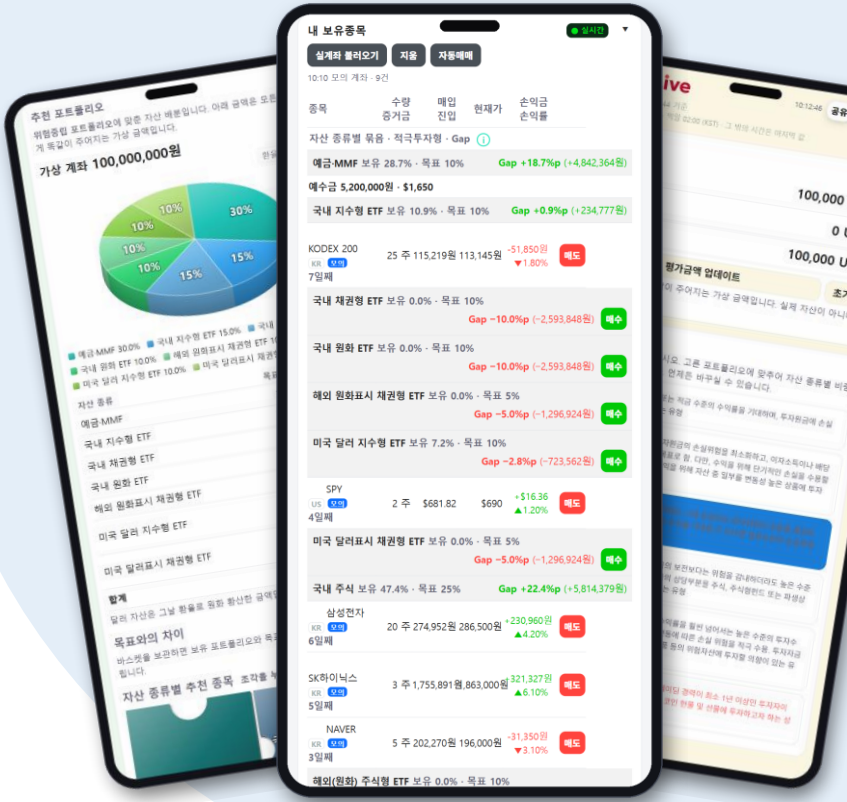

- Before official release — web beta only
- Real users: 1, the CEO (internal test)
- App revenue KRW 0 · 0 partnerships
- PG contract and mail-order business filing pending

Tour for Korea started in October 2026, built by the CEO alone with AI coding tools

PART 3 · HTS

Investing is not one big hit, it's a puzzle

Quant-based robo-advisor · Money Puzzle

PROBLEM

Retail investors hit three walls

Information is scattered, investing runs on gut feel, and advice is out of reach

1 App hopping

- Quotes in broker apps, news on portals, filings on DART
- Dozens of taps to understand one stock
- 'My portfolio' is never visible at a glance

2 All in on one stock

- Stocks picked from tip rooms and word of mouth
- Timing set by gut feel
- Risk piles up in one place

3 Advice is remote and costly

- Private banking serves the wealthy
- Robo-advisors show results but not the 'why'
- Number-heavy tables are hard for beginners

Scattered info · concentrated risk · remote advice — solved with one scroll

SOLUTION

Like a webtoon — one scroll, one screen

No tabs to tap. One thumb: market → my profile → picks → stocks · news · filings

① Market · Virtual account

② Profile · Picks

③ Stock lookup · Charts

④ Filings · News · Notices

Why a webtoon

- A gesture everyone already knows
- Uninterrupted flow — each screen sets up the next
- Korea and US on one line
- See → understand → add, in one go

PRODUCT

Three apps — one to view, two to trade

Public

Money Puzzle Stock

Allocation by risk profile · Korea and US focus

Virtual portfolio · past returns

Real-time quotes

No order function

CEO pilot

Money Puzzle HTS

Live trading app linked to broker accounts

Basket trading of profile-based portfolios

Monthly rebalancing

Public demo (/review/)

New · 2026.10

Money Puzzle Mini

Light trading tool for people in their 20s–30s

Watchlist · Charts

3-year P&L statement

No recommendations

PRODUCT

On one screen — stocks and my P&L

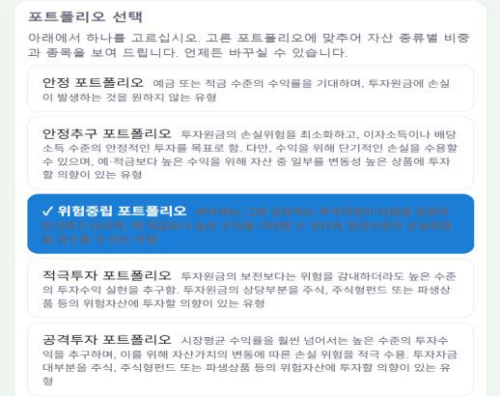

From left — stock lookup and charts · cumulative P&L and asset mix by risk profile

HOW IT WORKS

Three steps to my portfolio

Answer 7 questions to get an allocation fit for your profile and this month's buys

1 Check profile

KOFIA standard 7 questions → five levels, Conservative to Aggressive

2 Allocation picks

Asset mix ratio by profile + picks for each asset class (Korea and US ETFs and stocks)

3 One-click basket

Buy several names at once · rebalance on the 1st of each month

Quant-based robo-advisor

Data, not gut feel — pick with a tested momentum factor, trade by fixed rules

1 Blue chips only

- Top 50 by market cap, Korea and US
- ETFs: KRW/USD × regular/leveraged, four groups
- Inverse, ETN and other structured products excluded

2 Uptrends only

- Only stocks above the 200-day average
- Downtrending stocks cannot rank
- Stocks that closed limit-up the day before are excluded

3 Pick 12-month winners

- 12-month return rank, skipping the latest month
- 5 stocks · top ETF in each asset class
- Re-picked on the 1st of each month

★

Core strategy — Core + Satellite

Index ETFs (core) capture market return; 12-month momentum names (satellite) add excess return
6-year backtest · 0 of 100 random draws beat this rule · with auto-trading on, quant-based algorithmic investing

PROVEN RESULT

Alongside the indices — verified past returns

If the app's profile portfolios had started 1, 2 or 3 years ago and run on the current engine rules

Period	Conservative	Moderately Conservative	Moderate	Growth	Aggressive	KOSPI	KOSDAQ	S&P500	Nasdaq	Dow
1Y	+3.2%	+25.7%	+39.3%	+71.3%	**+129.9%**	+104.8%	+5.6%	+16.4%	+21.2%	+10.8%
2Y	+6.4%	+38.2%	+65.2%	+102.1%	**+217.1%**	+171.7%	+21.8%	+42.6%	+59.9%	+28.1%
3Y	+9.7%	+43.4%	+117.1%	+138.0%	**+318.1%**	+174.9%	+0.6%	+81.0%	+107.0%	+54.9%

Aggressive, 3 years: +318% — outperformed every index over the same period

20 start dates, median of 20 runs → 2026-10-02 · KRW basis (US indices converted to KRW) · rebalanced on the 1st monthly · stock stop-loss −15% · portfolio +30/−20% · idle cash, deposits and MMFs assumed at 3% a year

KOSPI's 1–2Y surge was a concentrated market: SK hynix and Samsung Electronics made up 64~75% of the market-cap gain

PROVEN RESULT

When markets shook — we fell less

Largest drop over the same period (max drawdown)

Period	Conservative	Moderately Conservative	Moderate	Growth	Aggressive	KOSPI	KOSDAQ	S&P500	Nasdaq	Dow
1Y	0.0%	−8.5%	−12.8%	−17.5%	−15.3%	**−38.6%**	**−47.4%**	−12.5%	−14.9%	−15.1%
2Y	0.0%	−8.5%	−13.3%	−17.5%	−18.4%	**−38.6%**	**−47.4%**	−17.8%	−23.1%	−17.0%
3Y	0.0%	−8.5%	−16.9%	−17.5%	−19.3%	**−38.6%**	**−47.4%**	−17.8%	−23.1%	−17.0%

※ KOSPI/KOSDAQ MDD comes from the 2026 sell-off (KOSPI 6/22 → 7/30, KOSDAQ 4/27 → 7/30), inside the last year, so 1/2/3Y values match.

All five profiles fell less than
KOSPI −38.6% · KOSDAQ −47.4%
in the same period

PROVEN RESULT

Even risk-adjusted — twice the index

Not just returns — 3 years by volatility (std. dev.), return per unit of risk (Sharpe) and max drawdown

3Y	Conservative	Moderately Conservative	Moderate	Growth	Aggressive	KOSPI	KOSDAQ	S&P500	Nasdaq	Dow
Sharpe	—	1.23	1.68	1.47	1.88	**1.03**	**0.08**	0.96	1.00	0.72
Vol.	0.0%	7.1%	13.5%	17.9%	24.5%	**34.1%**	**33.0%**	18.4%	23.0%	17.3%
MDD	0.0%	−8.5%	−16.9%	−17.5%	−19.3%	**−38.6%**	**−47.4%**	−17.8%	−23.1%	−17.0%

※ 3Y · median of 20 starts · Sharpe = (return − risk-free 3%) ÷ Vol. · Vol. = annual std. dev. · MDD = max drawdown · β, α vs KOSPI 50 + S&P500 (KRW) 50

Return per unit of risk (Sharpe) · 3Y

Aggressive 1.88

About 2× KOSPI 1.03 · S&P500 0.96

Volatility and excess return vs market (Aggressive · 3Y)

β 1.00 α +19.4% a year

As volatile as the market · 19%p more each year

What's different — how you see it, how it flows

	Typical broker app	Robo-advisor	Money Puzzle
Screen flow	Tabs and menus	Mostly result screens	**One vertical scroll**
Recommendation unit	Single stocks	Portfolio	**Profile portfolios + stocks**

Variable cost structure — for reference

Online karaoke business only · Year 3 mix · Company assumptions · Forecast

Segment	Revenue mix	Segment cost rate
Passes	40.7%	2%
LIVE streaming fee	2.2%	50%
Room opening	3.4%	20%
AI photo	3.4%	5%
Group photo	2.5%	10%
AI video	1.7%	50%
Masks	7.4%	0%
Room decor	7.4%	0%
Premium items	4.7%	0%
Streamer performance gifts (+40% new income)	16.2%	10%
Ads	10.4%	10%

Variable costs (excl. gifts and ads)	Rate
Payment fee (5% of top-ups)	5.0%
Segment cost	5.3%
Kumyoung and KOMCA royalties (not set)	20.0%
Structure total	30.3%
Applied if web top-up only	35%
If 100% in-app payment	43%
Used in financials (85% app)	42%
Performance gifts, ads (assumption)	10%

The gap between the structure total and 35% is a buffer, e.g. 3 free songs for new users.

Reflects 1.2x app pricing. The 15% Google/Apple fee assumes small-business program enrollment; at 30%, variable costs are about 54%.

The left-hand mix applies existing segment ratios to the Year 3 composition (regular and high spenders 500, items 180, performance gifts 150, ads 96, KRW M).

Streamer performance gifts: 40% of gift purchases are new company income.
